Understanding Delta-8

Delta-8-THC is nearly identical in chemical structure to the version of THC we are all familiar with in medical cannabis. The slight difference in chemical structure means intoxicating effects are diminished, however, many people described experiencing a strong, calming feeling. Delta-8-THC could be beneficial in combination with CBD, other cannabinoids, and terpenes to produce a stronger entourage effect than using any isolate, broad, or full-spectrum product alone.

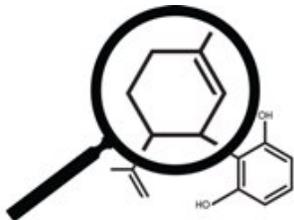

Do not drive or operate heavy machinery while using Delta-8. The similarity in chemical structures between Delta-8 and traditional THC means a standard drug test will not be able to differentiate between the two. Do not use if you are subject to standard drug testing.

Yes, Delta-8 is Legal

Based on the 2018 Farm Bill, hemp-derived cannabinoid extracts are legal— this includes Delta-8 extracted from hemp. As with all of our full-spectrum products the concentration of Delta-9 THC will not exceed 0.3% as specified in the legislation. Active CBD oil products are all manufactured using non-GMO hemp.

Delta-8 Warnings

As with all products that contain THC- Keep this product away from children. Delta-8-THC may cause intoxicating effects; do not use if you are pregnant, nursing, or if diagnosed with any health conditions. Consult your physician prior to using this product; in rare cases Delta-8-THC may affect blood pressure, heart rate, and/or intraocular pressure.

Familiar Flavors from your Favorite Strains

Our familiar strains come in six different varieties that are equally smooth. Grape Ape, Chem Dawg, OG Kush, Sour Diesel, Pineapple Express and Blue Dream.
